

ABOUT MYSELF

A motivated Computer Science student focused on Data Structures, Algorithms, and project-based learning. Interested in Competitive Programming and building real-world software projects.

NAME: Kanika Gupta
Email: kanikaguptadlf@gmail.com
GitHub: <https://github.com/k-reate>
Codeforces: <https://codeforces.com/profile/k-reate>
Portfolio: <k-reate/portfolio-website>

EDUCATION

School: Shalom Hills International School [till grade 10th]
Nav Jeewan Sr. Sec. School [grade 11th & grade 12th]
Coaching : Allen career institute
Year of passing grade 12th: 2025

SKILLS

- Programming Languages: C++, Python
 - Web Development: HTML, CSS
 - Core Skills: Problem Solving, Basic Data Structures, Logical Thinking
-

PROJECTS

1. Study System (Python)

A Python-based system to track study hours and analyze consistency patterns for productivity improvement and self-monitoring.

Tech : Python

GitHub: <k-reate/study-system>

2. Hunger Hub (Web Project)

A clean UI/branding project for a restaurant concept focusing on modern design principles and user interface structure.

Tech : HTML, CSS

GitHub: <k-reate/hunger-hub-manager>

COMPETITIVE PROGRAMMING

- Active on Codeforces (Handle: k-reate)
 - Solving beginner-level problems (800-rated level)
 - Currently improving speed and accuracy in problem solving
 - Focus: implementation, loops, basic algorithms
-

LEARNING FOCUS

- Competitive Programming (Codeforces)
 - Data Structures & Algorithms
 - Project-based learning in Python and Web Development
 - Building consistent problem-solving discipline
-

GOALS

- Improve from beginner to intermediate CP level
 - Build strong CS fundamentals through projects and contests
 - Develop consistent coding and problem-solving habit
 - Programming: C++, Python
 - Web: HTML, CSS
 - CS Fundamentals: Data Structures (basic), Problem Solving
-

INTERESTS

Competitive Programming, Software Development, Music, Drawing
